(54) Title: SHARED MEDIUM COMMUNICATION SYSTEM

(57) Abstract: In a shared medium communication system (100), a common measure for avoiding collisions of application data is a request grant mechanism. Secondary stations (104) contending for upstream bandwidth send requests on a shared medium (106) that are each answered by a grant (110) from the primary station (102). The efficiency of such a system can be improved if at least two access requests are merged into a multi-request (108).
